

THE HERITAGE HOUSES WORKSHOP SERIES

Spring 2012

Gain practical and in-depth knowledge on how to repair, maintain, and preserve older homes. Highly-trained professionals offer information on issues to consider when planning a repair job, guidelines and standards appropriate to the character-defining features of the house, and instruction on proper techniques and materials to be used for repairs and ongoing maintenance.

Each of the six workshops have been approved for 1.5 LU-HSW credits for AIA/CES.

Time: **6:00–7:30 pm**
Location: **Dower School of Real Estate,
1114 11th Avenue, Kaimukī**
Cost/session: **\$25 – General
\$20 – HHF & AIA Members**

**HISTORIC
HAWAII
FOUNDATION**

*Registration is ongoing and registrants
may enroll in one or more of the
sessions offered in this series.*

*Registration forms and additional
information available at
www.historichawaii.org*

*Historic Hawai‘i Foundation
gratefully acknowledges the sponsors
and instructors of this series.*

THE HERITAGE HOUSES WORKSHOP SERIES

Spring 2012 – SCHEDULE

March 7

Preservation Basics

Kiersten Faulkner, Executive Director, Historic Hawai'i Foundation

Become familiar with rehabilitation standards for the treatment of historic properties. View guidelines on how to adapt an historic property for contemporary use, while preserving materials and architectural features significant to the era in which the home was built.

March 21

Windows

Joy Davidson, Architect, Mason Architects, Inc.
Alan Shintani, General Contractor, Alan Shintani, Inc.

Find out about cost-effective and energy-efficient repair, restoration and maintenance of original wood windows. Learn how to recognize fenestration patterns, safely remove lead paint & glass, repair epoxy, apply glazing putty, fit weather-stripping, and re-install window sashes.

April 4

Home Finishes

Barbara Shideler, Architect, Mason Architects, Inc.
Katherine Stephens, Architect, Mason Architects, Inc.

Examine color schemes, types of paint, and finishes appropriate to home interiors and exteriors from the Victorian age through the Modern era. Obtain practical advice on how to prepare surfaces, strip woodwork, analyze paint samples; and identify, avoid or safely remove hazardous materials.

April 18

Metalwork and Hardware

Glenn Mason, Architect, Mason Architects, Inc.

Discover what methods and techniques are recommended, whether mechanical or chemical, to remove rust and corrosion from structural elements and decorative features of metal on the home. Find out what measures are followed to strengthen, protect and maintain metal components from future degradation.

May 2

Landscape

Loriann Gordon, Landscape Architect, Loriann Gordon Landscape Architect

Follow the evolution of the modern landscape in Hawai'i, and become familiar with the careers and styles of the Masters of Modern Landscape Architecture in the islands. Learn to discern the historical context of a landscape, and the elements that are important to a landscape's historic integrity.

May 16

Prepare for Disaster

Maja Clark, Collections Manager, Doris Duke Foundation for Islamic Art

Prepare for a disaster by becoming aware of the potential hazards and risks involved, and knowing what precautions are necessary to safeguard your home and property. Obtain important information about available resources in dealing with the aftermath of a disaster.
